

Apostolic Humanism?

1 John 4:3

3) And every spirit that confesseth not that Jesus Christ is come in the flesh is not of God: and this is that *spirit* of antichrist, whereof ye have heard that it should come; and even now already is it in the world.

Humanism's final step is called Atheism. All humanists are not atheists, but all atheists are humanists. There is an agenda with all humanists, however. They even have an entire Humanist Society Association with their own Humanist Manifesto. The membership role would shock you by the names that are listed. Humanism is a religious worldview by definition. Hu-Man-ism is unequivocally the worship of man. Humanism's philosophy, as we all know, has overwhelmingly flooded the church since the 1970's. So, we should not be surprised to witness the final steps towards atheism in a somewhat new philosophical worldview known as trans-humanism.

Humanism's claims state that man is equal to God, or the term "we are gods," is a better understanding of humanism. Humanism's thinking has invaded the pulpit through pop philosophy and modern-day type preaching in our churches that never deals with sin by never naming sin. Humanism highlights the goodness of man and the greatness of man's accomplishments, primarily through education. Subsequently, God now "needs man"- type preaching abounds.

Contemporary oneness humanist preachers introduce men to God by altogether avoiding the subject of sin and what sin looks like in the trends of our culture today. These new oneness humanists have craftily omitted the preaching of trends that sin operates through today, especially in the arena of technology. Therefore, the days of heavy conviction have passed because man is essentially good and should never feel condemned. They have learned to preach faith without any real confrontation with the enemy of faith. Hyped-up, feel-good, or else, chicken soup for the soul preaching is all too common now for the oneness humanist.

Every man is right in their own eyes, and truth is mostly reduced to personal convictions. After all, there is so much more Bible to preach; why preach on sin and name the sins of today?

While humanism exalts man to be equal with God, atheism claims there is no God. Atheism is the ultimate end to humanism. So, what is this middle ground between humanism and atheism? Trans-humanism. There is a lot of talk about human behavior in terms of "trans" these days. So, let's look at this uniquely new barbarian that is linking arms with humanism and atheism to bridge the final chasm towards the system and the man whom scriptures refer to as antichrist. Transhumanism is a subtle enemy of the church that cultivates an insatiable thirst for more and more technologically enhanced approaches toward the work of the kingdom. This expanding wave of technological pursuit towards worship and the exaltation of God's Kingdom through technology platforms where all of the world traffics and worldly trends of this culture are praised and highly exalted, not only is diametrically opposed to the sanctification standards of the church, but it is the final assault against truth and holiness.

New Oxford Dictionary - Transhuman:

The belief or theory that the human race can evolve beyond its current physical and mental limitations, especially by means of science and technology.

New-Ager Elon Musk is one of the leading influencers for the transhumanist society. But he is not alone. Recently (this month), the elite globalist society joined arms with leading voices of the transhumanist society in Switzerland for their annual World Economic Forum. (W.E.C.) The world's wealthiest and most influential people are pressing for the quicker unveiling of more expansive international laws that force an invasive and unethical level of augmented technology upon the human family, making us totally dependent upon them.

Below is an excerpt from their very own Transhumanist Manifesto. The manifesto is built on three basic principles that form a special unity of one mindset. The manifesto then lays out the overall agenda to project man into a technological society that removes man's deplorable attribute called conscience. Conscience stands in the way of these super-humanists, known as transhumanists. Essentially, through technology, transhumans want to make us part human with an augmented brain — or chips installed into our brains, thereby making all humans walking computers. This is their crowning objective. To produce a high-bred human with all perceivable knowledge instantly available at all times. The fruit from the forbidden tree of knowledge is forever in the mouth of a transhumanist.

This augmented human will become a virtual reality one day for all transhumanists. This is why we see such a thirst for more and more tech toys in society today. We are being led like sheep to the slaughter. This level of technology is the most fundamental platform that the Antichrist will stand on and work through.

Transhumanists are working feverishly towards the unveiling of more and more technology to desensitize the human family to believe technology is innocent and needed. There is an agenda, and our churches that are increasingly incorporating more and more technology via the televising livestream video church in liturgical programs are walking headlong into the abyss being prepared by transhumanists. They essentially are becoming part of the final solution.

An excerpt of the “Big Three” principles introduced in their own Manifesto:

“The Transhumanist Manifesto challenges the human condition. This condition asserts that — aging is a disease, — augmentation and enhancement to the human body and brain are essential to prevail, and — human well-being is essential in order to prosper within safe and healthy environments.”

From Wikipedia:

What is meant by transhuman?

Transhuman, or trans-human, is the concept of an intermediary form between human and posthuman. In other words, a transhuman is a being that resembles a human in most respects but who has powers and abilities beyond those of standard humans.

Transhumanism intends to build a supermodel of a human being by implementing the latest technological creations inside the human body. This new “posthuman” will look exactly like

a human because it is essentially a human but with augmented technological attributes. Elon Musk claims it's closer than "we can imagine." Most likely, the technology is already here, but the international laws are not in place to provide the ethical and legal shelter needed for implementation.

The COVID virus, whether mandated or incidental, no doubt was a precursor to examining international response to the forced global government oversight that was imposed upon us all to move forward with their overall agenda. As Mark Zuckerberg of Facebook unashamedly stated regarding government-imposed shutdowns during COVID, this global reset is needed to accomplish greater projects.

All said and done, why wouldn't we, as the holiness, sanctified church, draw the line in our worship venues to abstain from this known direction? Those reaching into these technological areas for "evangelism" purposes are clueless to the spirit of antichrist that is now working in humanist, transhumanist, and atheist societies. Read their manifestos for yourself. Investigate their motives and agendas that are plainly spelled out in their own words. We are witnessing the final chapters of the human journey on earth. We are also witnessing the initial waves that will usher in the "great falling away." The spirit of antichrist is now at work. Beware of the oneness humanist who faithfully stands in pulpits today and speaks of sin sparingly and in generalities. Listen close to them. They never name sin nor the technological trends that sin is viciously operating through today. Hmm? Elon Musk would be very proud of them.

Maranatha.

P.S.

For a very slow and heavy read that is highly academic, examine the book: "Eschatology and the Technological Future" by scholar Michael S. Burdette.

For a calmer and more readable treatise:
"Transhumanism and the Image of God" by Jacob Shatzer.
