

Can You Stop When the Light Is Green?

My pastor, Bishop Tommy Johnson, tells a story about a couple that was on their way to church when suddenly the man began breaking at an intersection. His wife asked him why he was stopping when the light was green; just then a semi-truck barreled through the intersection. The man did not know why he stopped, but he did, the moment the truck went through the intersection.

The question posed to people seeking the will of God is, "Can you stop when the light is green?" There are times in our lives when all things look like they are on "go". However, the Holy Ghost is nudging us to slow down or perhaps stop all altogether. We need to be sensitive enough to the Holy Ghost and be able to hear it bid us stop—when the light is green.
